

Table of contents

CHAPTER I - ALGORITHMS FOR REAL NUMBERS.....	11
Section 0. Introduction.....	11
Section 1. The Euclidean Algorithm (EA).....	12
Section 2. Jacobi Algorithm (JA).....	14
Section 3. Perron Algorithm (PA).....	16
Section 4. Hasse and Bernstein Algorithm (HBA).....	17
CHAPTER II - BAICA'S GENERAL EUCLIDEAN ALGORITHM (BGEA)....	19
Section 0. Introduction.....	19
Section 1. The proof of the necessary condition for the periodicity of (BGEA).....	19
1*. The (BGEA) definition, basic properties.....	19
2*. A periodic (BGEA) - notations.....	21
3*. The first fugue of the (BGEA) of $a^{(0)}$	23
4*. The first fugue of the (BGEA) of $a^{(0)}$, continued.....	24
5*. Periodicity of the (BGEA) of $a^{(0)}$ - completed.....	26
6*. Irreducibility and roots of polynomials.....	28
Section 2. The proof of the sufficient condition for the periodicity of (BGEA).....	32
Section 3. (BGEA) an n-dimensional equivalent of Euler – Lagrange Theorem (ELT) from quadratics.....	33

CHAPTER III - (BGEA) and the solution of all the open problems in the algebraic number theory.....	34
Section 0. Introduction.....	34
Section 1. (BGEA) is more than the General Simple Continued Fractions Algorithm.....	34
Section 2. (BGEA) and the solution of the Hermite's problem.....	36
1*. Case n = 2.....	36
2*. Case n = 3.....	37
3*. Case n = 5.....	38
4*. The general case.....	38
Section 3. (BGEA) and the solution of Dirichlet's problem.....	39
1* All known units from (BGEA).....	40
2* Hasse and Bernstein units from (BGEA).....	51
3* Halter – Koch and Stender units from the periodicity of (BGEA).....	52
4* Halter – Koch units from the periodicity of (BGEA).....	52
5* Neubrand units from the periodicity of (BGEA).....	54
Section 4. (BGEA) and the solution of Galois' theory of polynomials problem.....	56
Section 5. (BGEA) and the solution of the Fermat Last Theorem (FLT) problem.....	56
Section 6. Units from (BGEA) play an important role in solving (FLT).....	59
Section 7. G. Faltings' proof of (FLT) in the geometry of the elliptic curves (GEC).....	60
 CHAPTER IV - MORE IMPORTANT APPLICATIONS OF (BGEA).....	 61
Section 0. Introduction.....	61

Section 1. (BGEA) Algorithmic approximation of some second, third and fifth degree irrationals.....	61
1*. Approximation of irrationals - case $n = 2$	63
2*. Explicit representation of the matricians.....	64
3*. The convergents of $\sqrt{2}$	66
4*. The case $n = 3$	67
5*. The convergents of $\sqrt[3]{D^3 + 1}$	71
6*. The case $n = 5$	74
Section 2. Some new combinatorial identities derived from units in algebraic number fields.....	78
1*. Introduction.....	78
2*. Positive powers of e	79
3*. Negative powers of e	83
4*. New combinatorial identities.....	85
Section 3. Some diophantine equations and identities from (BGEA)	87
1*. Euler-Pell's equation.....	89
2*. Units in $Q(w)$, $w = \sqrt{D^2 + 1}$	90
3*. The cubic diophantine equations.....	91
4*. Units in the cubic field.....	93
5*. More identities.....	99
6*. Fifth degree diophantine equations.....	100
7*. Fifth degree identities.....	102
8*. More about units and identities.....	107
Section 4. n-Dimensional Fibonacci numbers and their application from (BGEA).....	110
1*. Periodic (BGEA).....	112
2*. Explicit matricians $A_0^{(v+n)}$	114
3*. Matricians of degree s , $s=1,2,\dots,n-1$	115
4*. Approximation of irrationals by rationals.....	119
5*. Diophantine equations.....	120
6*. More diophantine equations.....	122
7*. Identities and units.....	124
Section 5. (BGEA) and sums of some infinite series.....	126
Section 6. Some infinite series and their sums from (BGEA).....	130

Section 7. (BGEA) the explicite solution of HILBERT 10-th problem...	135
Section 8. Conclusions	136
Chapter V. MATHEMATICAL MODELS TO ESTIMATE THE ENERGY - ECOLOGIC EFFICIENCY OF THERMOPOWER PLANTS (TPP).....	137
Section 0. Introduction.....	137
Section 1. A global methodology to estimate the energy – ecologic efficiency of thermopower plants (TPP).....	137
1*. Preliminaries.....	138
2*. The new energy-ecological methodology.....	141
3*. Application of new methodology to thermopower plants.....	147
4*. Conclusions.....	154
Section 2. A new variant methodology to estimate globally the ecological impact of thermopower plants.....	157
1*. Preliminaries.....	157
2*. Methodology which makes use of sulphur and hydrogen as comparative elements.....	159
3*. Conclusions.....	163
Section 3. The energy ecological efficiency of desulphurization and denox systems and installations in thermopower plants.....	165
1*. Preliminaries.....	165
2*. Measures to reduce the environment pollution at TPP Voitsberg Austria.....	167
3*. Situation of TPPs from the energy ecological efficiency point of view in Romania	169
4*. Conclusions.....	174
References.....	175
