

## CONTENTS

<b>CHAPTER 1. THE RIEMANN HYPOTHESIS .....</b>	<b>11</b>
1.0. Introduction .....	11
1.1. How the hypothesis was not proved .....	13
1.2. How the hypothesis was proved .....	14
1.3. Comparison with the contour integration .....	16
1.4. Development of alternative 4) .....	17
1.5. Development of alternative 5) .....	17
1.6. Titchmarsh's observation .....	20
1.7. Use of the argument principle .....	20
1.8. The case of the L-series .....	21
1.9. The case of the Heilbronn-Davenport function .....	23
1.10. The case of Epstein's zeta function .....	25
1.11. Ramanujan's function and series .....	27
1.12. The case of the function $\zeta_n(s)$ .....	28
1.13. Generalization of the method to other cases .....	29
1.14. Answers to some objections that have been received .....	30
<b>CHAPTER 2. AN ALTERNATIVE PROOF USING THE FUNCTION <math>N(\sigma, T)</math> .....</b>	<b>32</b>
2.0. Introduction .....	32
2.1. Littlewood's formula .....	32
2.2. Two auxiliary formulas .....	34
2.3. Evaluation of $T_1$ .....	34
2.4. Evaluation of $T_2$ .....	35
2.5. The final formula .....	36
<b>CHAPTER 3. SOLUTION OF THE GOLDBACH'S CONJECTURE .....</b>	<b>37</b>
3.0. Introduction .....	37
3.1. Derivation of a basic formula .....	37
3.2. The evaluation of $L\{\Delta v[u]\}$ .....	38
3.3. The poles of $f(s) = \sum_p \log p^{x^p} = F(x)$ .....	39
3.4. Abelian and Tauberian theorems concerning the Laplace transform .....	41
3.5. Application of the Abelian theorem to (3.3.8) .....	41
3.6. Evaluation of $v_m^*(t)$ according to (3.5.3) .....	42
3.7. The evaluation of $v_m^*(t)$ and $f_N(t)$ .....	44
3.8. Finding the limit of $v_m^*(t)$ when $N \rightarrow \infty$ .....	45
3.9. Bounds for $v(t)$ .....	48
3.10. Conclusion .....	49
<b>CHAPTER 4. CLARIFICATIONS OF THE AUTHOR'S PREVIOUS RESULT ON GOLDBACH'S CONJECTURE .....</b>	<b>50</b>

4.0.	Introduction .....	50
4.1.	The relations between $\theta([u])$ and $v(t)$ .....	50
4.2.	Transformation of the sum in (4.1.5) into an integral .....	50
4.3.	Evaluation of $L\{\Delta\theta([u])\}$ .....	53
4.4.	The use of (4.3.4) .....	54
4.5.	The evaluation of $L^{-1}\{T_1(s)\}$ .....	55
4.6.	The evaluation of $L^{-1}\{T_2(s)\}$ .....	56
4.7.	The evaluation of $L^{-1}\{T_3(s)\}$ .....	56
4.8.	Return to (4.4.3) .....	57
4.9.	The evaluation of $F_1(t)$ in (4.8.1) .....	57
4.10.	The evaluation of $F_2(t)$ in (4.8.2) .....	59
4.11.	The value of $V(t)$ .....	59
4.12.	Choosing $N$ as a function of $t$ .....	60
4.13.	Miscellaneous bounds and majorizations .....	61
4.14.	Improved Lemma (3.8.1) .....	61
<b>CHAPTER 5. BAICA'S CONTRIBUTION TO THE SOLUTION OF THE BINARY GOLDBACH PROBLEM .....</b>		<b>64</b>
5.0.	Introduction .....	64
5.1.	Survey of Baica's proof of Goldbach conjecture [2] .....	65
5.2.	An immediate consequence of (5.1.6) .....	66
5.3.	Judicious choice of $N$ as $N = t^{\frac{1}{6.5}}$ in (5.2.2) leads to the conclusion of (5.3.1) .....	67
<b>CHAPTER 6. THE BINARY GOLDBACH PROBLEM .....</b>		<b>68</b>
6.0.	Introduction .....	68
6.1.	The relation between $\theta([u])$ and $v(u)$ .....	69
6.2.	Transformation of the sum in (6.1.5) into an integral .....	70
6.3.	The evaluation of $L\{\Delta\theta([u])\}$ .....	71
6.4.	The use of (6.3.4) .....	72
6.5.	The evaluation of $L^{-1}\{T_1(s)\}$ .....	73
6.6.	The evaluation of $L^{-1}\{T_2(s)\}$ .....	74
6.7.	The evaluation of $L^{-1}\{T_3(s)\}$ .....	74
6.8.	The evaluation of $T_3$ .....	75
6.9.	Return to (6.4.3) .....	75
6.10.	The evaluation of $F_1(t)$ in (6.10.1) .....	75
6.11.	The evaluation of $F_2(t)$ in (6.10.2) .....	77
6.12.	The evaluation of $F_5(t)$ .....	77
6.13.	The value of $v(t)$ .....	77
6.14.	Choosing $N$ as function of $t$ .....	78
6.15.	Miscellaneous bounds and majorations .....	79
6.16.	Improved Lemma 1, Lemma 2 and Lemma 3 .....	80

**CHAPTER 7. AN ABRIDGED METHOD TO DERIVE THE ASYMPTOTIC FORMULA**

	<b>FOR THE GOLDBACH DECOMPOSITIONS .....</b>	<b>80</b>
7.0.	Introduction .....	80
7.1.	The starting formula .....	85
	<b>CHAPTER 8. UNCONDITIONAL SOLUTION OF THE TWIN PRIME PROBLEM .....</b>	<b>88</b>
8.0.	Introduction .....	88
8.1.	An intersection formula .....	88
8.2.	The asymptotic value of $\Delta\theta(u)$ .....	89
8.3.	Return to (8.1.6) .....	90
8.4.	Evaluation of the second term of (8.3.5) .....	91
8.5.	Choice of N as a function of t .....	92
	<b>CHAPTER 9. A BRIEF AND COMPLETE SOLUTION OF THE CUBOIDS PROBLEMS .....</b>	<b>93</b>
9.0.	Introduction .....	93
9.1.	Intersection formulas .....	93
9.2.	Lemma (9.2.1) .....	94
9.3.	The asymptotic value of $\Delta\left\{\left\{\sqrt{t}\right\}\right\}$ .....	95
9.4.	Return to the triple integral .....	97
9.5.	Perfect cuboids .....	99
	<b>CHAPTER 10. THE SINGULAR SERIES OF THE GENERALIZED FERMAT EQUATION .....</b>	<b>100</b>
10.0.	Introduction .....	100
10.1.	Intersection formula .....	100
10.2.	Asymptotic value of $\Delta\left(\left[\sqrt[a]{y_1}\right]\right)$ .....	101
10.3.	Asymptotic formula for N(u) .....	101
10.4.	Generalization to the Diophantine equation $Z^{a_0} = x_1^{a_1} + \dots + x_n^{a_n}$ .....	103
	<b>CHAPTER 11. PRIMES OF THE FORM <math>-p^k = x_1^m + x_2^m + \dots + x_n^m \leq N</math> .....</b>	<b>105</b>
11.0.	Introduction .....	105
11.1.	The case $k = 1$ .....	105
11.2.	The case $k \geq 2$ .....	106
11.3.	Comparison with known results .....	107
	<b>CHAPTER 12. TRIPLETS AND OTHER SEQUENCES OF PRIMES .....</b>	<b>109</b>
12.0.	Introduction .....	109
12.1.	A formula for N(m) .....	109
	<b>REFERENCES .....</b>	<b>112</b>
